## SOUTH DAKOTA BREEDING BIRD ATLAS 2

The SOUTH DAKOTA BREEDING BIRD ATLAS is a multi-year project to determine which species of birds nest in the state and where they nest. As part of this effort, an Atlas field worker has parked here in order to survey a nearby area.

Atlas field workers are only interested in observing the breeding birds of this area. They will not cause any inconvenience to the land owners. If you have concerns, or wish to participate, please contact
